EDUCATION

Gyan Ganga Institute of Technology and Science, Jabalpur

B.Tech. in CSE (Artificial Intelligence and Machine Learning)
Sept, 2023 - Sept, 2027

C.G.P.A. : 8.36 / 10

EXPERIENCE

GOOGLE DEVELOPER GROUP | Web3 and AI Lead

September 2024 - Present | Gyan Ganga Institute of Technology and Science, Jabalpur

- Selected as a core team member to lead Web3 and AI initiatives for the GDG on campus,
- Educated and managed over 1,000 students, providing mentorship and hands-on learning opportunities,
- Organized sessions on open source contributions, GitHub, and conducted different hackathons like "Build With AI".

PROJECTS

QrBuilder - Generate Professional QR Codes for Everything

August 2024 - Present | Website

- Built and deployed a SaaS platform (QR Builders) using Next.js and Supabase to generate and manage custom QR codes,
- Integrated Polar for secure payment processing and subscription-based access to premium features,
- Implemented user authentication, real-time database handling, and responsive UI with deployment on Vercel.

Eww - An NFT Marketplace for Memes

August 2024 - Present | Website | GitHub

- Built an NFT marketplace on the Solana blockchain, with NFTs minted using the Metaplex Core NFT standard,
- Utilized Pinata IPFS for secure, decentralized storage of digital assets,
- Developed the frontend using Next.js to provide a seamless and responsive user experience

SummarizeAI - TLDR; made easy with SummarizeAI

July 2024 - July 2024 | LinkedIn | GitHub

- Build Full-stack web developer using django, and integrated background processes using celery,
- Used open-source LLM from huggingface and uses langchain for integration,
- Process Youtube Videos, WebPages, and documents files for summarizing content and captions.

Sollink - The Decentralized Chat dApp

June 2024 - July 2024 | Website | LinkedIn

- Sollink is a decentralized chat application built on the Solana blockchain, offering secure and private messaging for individuals,
- Utilized Pinata IPFS for secure decentralized storage for profile pics, etc.,
- Created Smart Contracts in Rust programming language using Anchor Framework
